PROFILE

I build AI agents and automations, and connect the systems teams use for customer service, marketing, and sales.

TECHNICAL SKILLS

n8n, Python, JavaScript, Node.js, React, Next.js, PostgreSQL, Supabase, Docker, Git, OpenAI, RAG, Kommo, HubSpot, GoHighLevel, WhatsApp. REST APIs, webhooks, LLMs, and integrations with CRMs and Google Calendar.

PROFESSIONAL EXPERIENCE

Digital Fuel Agency | AI Systems & Automation Engineer | Part-Time

OCT 2026 - PRESENT

I work remotely as a part-time AI Systems & Automation Engineer at Digital Fuel Agency in the United States.

B2Med | Automation & AI Solutions

MAR 2024 - OCT 2026

I led the technology team and built and maintained more than 300 workflows with n8n, Python, and JavaScript. I worked on AI presales agents for over 50 clinics, CRM and calendar integrations, and internal process automation. I also built a content production tool that brought a three-day process down to minutes.

Foltz Concierge Médico | AI & Automation Consultant

OCT 2025 - PRESENT

At Foltz, I consult for more than 20 clients. I look at how their teams work, design the solution, and build agents and integrations for customer service, lead qualification, and sales.

NIU | Software Developer

JAN - AUG 2024

I built a React and Node.js registration platform for beach tennis tournaments, including the checkout and Pix payment flow.

Pax Primavera | Junior Software Developer

FEB 2022 - MAR 2023

I built an internal HR CRM with React interfaces, dashboards, and reusable components. I also worked in Figma, from wireframes to the design system.

Freelance | Chatbot Development

JAN 2021 - JAN 2022

I built Discord bots in Python, with interactive features for online communities.

SELECTED PROJECTS

EverBetter - I built and maintain a website analysis app for SEO and AI search, with technical checks and recommendations.

Landpages - I created a responsive landing page showcase with four interactive demos and WhatsApp contact links.

AI customer service in n8n - I built a 10-module system with AI agents, RAG, MCP, and integrations for WhatsApp, CRMs, and calendars.

EDUCATION & LANGUAGES

Systems Analysis and Development - UNIGRAN - Brazil, in progress.
Native Portuguese · Advanced English (C1). EF SET certificate.
